Sec. 20-103a. State Dental Commission. (a) The State Dental Commission shall consist of nine members appointed by the governor, subject to the provisions of section 4-9a, six of whom shall be practitioners in dentistry residing in this state who are in good standing in their profession and three of whom shall be public members. No member of said commission shall be an elected or appointed officer of a professional association of members of his profession or have been such an officer for the year immediately preceding his appointment. The Commissioner of Public Health, with advice and assistance from the Dental Commission, may issue regulations to implement the provisions of this chapter, and to insure proper dental care and the protection of public health, considering the convenience and welfare of the patient, methods recommended by the canon of ethics of the Connecticut State Dental Association and the American Dental Association and accepted health standards as promulgated by local health ordinances and state statutes and regulations.

(b) The governor shall appoint a chairperson from among such members. Said commission shall meet at least once during each calendar quarter and at such other times as the chairman deems necessary. Special meetings shall be held on the request of a majority of the commission after notice in accordance with the provisions of section 1-21. A majority of the members of the board shall constitute a quorum. Members shall not be compensated for their services. Any member who fails to attend three consecutive meetings or who fails to attend fifty per cent of all meetings held during any calendar year shall be deemed to have resigned from office. Minutes of all meetings shall be recorded by the commission. No member shall participate in the affairs of the commission during the pendency of any disciplinary proceedings by the commission against such member. No member shall serve for more than two full consecutive terms commencing after July 1, 1980. Said commission shall (1) hear and decide matters concerning suspension or revocation of licensure, (2) adjudicate complaints filed against practitioners and (3) impose sanctions where appropriate.

Sec. 20-106. License. No person shall engage in the practice of dentistry or dental medicine unless such person has first obtained a license from the department of public health.

Sec. 20-106a. Designation of limited practice. No licensed and registered dentist shall designate in any matter that he has limited his practice to one of the specialty areas of dentistry expressly approved by the American Dental Association unless such dentist has completed two years of advanced or postgraduate education in the area of such specialty and has notified the Dental Commission of such limitation of practice. Nothing contained herein shall prohibit any licensed and registered dentist who has limited his practice prior to May 8, 1975, from continuing to designate such limitation.

Sec. 20-107. Application for license. (a) Each application for a license to practice dentistry shall be in writing and signed by the applicant and no license shall be issued to any person unless he or she presents a diploma or other certificate of graduation from some reputable dental college or from a department of dentistry of a medical college conferring a dental degree, or unless he or she is practicing as a legally qualified dentist in another state having requirements for admission determined by the department to be similar to or higher than the requirements of this state.

(b) The Dental Commission may, with the consent of the Commissioner of Public Health, determine the colleges which shall be considered reputable dental or medical colleges for the purposes of this chapter. The commission shall consult when possible with nationally recognized accrediting agencies when making such determinations.

(c) Notwithstanding the provisions of subsections (a) and (b) of this section, the department may issue a license to practice dentistry to any applicant holding a diploma from a foreign dental school, provided the applicant (1) is a graduate of a dental school located outside the United States and has received the degree of doctor of dental medicine or surgery, or its equivalent; (2) has passed the written and practical examinations required in section 20-108, as amended by this act; (3) has successfully completed not less than two years of graduate dental training as a resident dentist in a program accredited by the Commission on Dental Accreditation; and (4) has successfully completed, at a level greater than the second postgraduate year, not less than two years of a residency or fellowship training program accredited by the Commission on Dental Accreditation in a community or school-based health center affiliated with and under the supervision of a school of dentistry in this state, or has served as a full-time faculty member of a school of dentistry in this state pursuant to the provisions of section 20-120 for not less than three years.

Sec. 20-108. Examination of applicants. (a) Except as provided in section 20-110 and subsection (b) of this section, each applicant for a license to practice dental medicine or dental surgery shall be examined by the Department of Public Health, under the supervision of the Dental Commission as to his or her professional knowledge and skill before such license is granted. Such examination shall be conducted in the English language. The Dental Commission may, with the consent of the Commissioner of Public Health, accept and approve, in lieu of the written examination required by this section, the results of an examination given by the Joint Commission on National Dental Examinations, subject to such conditions as the commission may prescribe, and the Dental Commission with the consent of the Commissioner of Public Health, may accept and approve, in lieu of the written and practical examination required by this section, the results of regional testing agencies as to written and practical examinations, subject to such conditions as the commission, with the consent of the Commissioner of Public Health, may prescribe. Passing scores shall be established by the department with the consent of the commission.

(b) In lieu of the practical examination required by subsection (a) of this section, an applicant for licensure may submit evidence of having successfully completed not less than one year of graduate dental training as a resident dentist in a program accredited by the Commission on Dental Accreditation, provided at the end of such year of graduate dental training as a resident dentist, the supervising dentist provides documentation satisfactory to the Department of Public Health attesting to the resident dentist's competency in all areas tested on the practical

examination required by subsection (a) of this section. Not later than December 1, 2005, the Dental Commission, in consultation with the Department of Public Health, shall develop a form upon which such documentation shall be provided.

Sec. 20-109. Fee for examination. Upon the payment of a fee of four hundred fifty dollars by an applicant, the department of public health, under the supervision of the dental commissioners shall examine applicants. All examinations shall be given at least once per year and at other times prescribed by the department. The department shall grant licenses to such applicants as are qualified.

Sec. 20-110. Licenses to out-of-state applicants. The department of public health may without examination, issue a license to any dentist who is licensed in some other state or territory, if such other state or territory has requirements for admission determined by the department to be similar to or higher than the requirements of this state, upon certification from the board of examiners or like board of the state or territory in which such dentist was a practitioner certifying to his competency and upon payment of a fee of four hundred fifty dollars to said department. No license shall be issued under this section to any applicant against whom professional disciplinary action is pending or who is the subject of an unresolved complaint. The department shall inform the Dental Commission annually of the number of applications it receives for licensure under this section.

Section 20-112a. Dental assistants. A licensed dentist may delegate to dental assistants such dental procedures as the dentist may deem advisable, including the taking of dental x-rays if the dental assistant can demonstrate successful completion of the dental radiography portion of an examination prescribed by the Dental Assisting National Board, but such procedures shall be performed under the dentist's supervision and control and the dentist shall assume responsibility for such procedures; provided such assistants may not engage in: (1) Diagnosis for dental procedures or dental treatment; (2) the cutting or removal of any hard or soft tissue or suturing; (3) the prescribing of drugs or medications that require the written or oral order of a licensed dentist or physician; (4) the administration of local, parenteral, inhalation or general anesthetic agents in connection with any dental operative procedure; (5) the taking of any impression of the teeth or jaws or the relationship of the teeth or jaws for the purpose of fabricating any appliance or prosthesis; (6) the placing, finishing and adjustment of temporary or final restorations, capping materials and cement bases; or (7) the practice of dental hygiene as defined in section 20-126l, as amended.

claim form for the purpose of receiving payment or reimbursement; and (4) intentionally accepting payment from a third party as payment in full for patient services rendered when (A) the patient has been excused from payment of any applicable deductible by the license holder and (B) such license holder fails to notify the third party of such action.

(b) A full-time faculty member of a school of dentistry in this state who is licensed in another state or who has exceptional qualifications as approved by the Dental Commission may be granted a provisional license upon consent and approval of the Dental Commission which provisional license shall be in effect during such time as the licensee is in the full-time employment of a school of dentistry within the state. Such provisional license shall limit the licensee to the practice of dentistry in the school of dentistry of which he is a member of the faculty or in any hospital affiliated with such school.
